

# Alexander Seidel

(+44)7579037186

alalseidel@gmail.com

First-Class BSc (Hons) Computing with Artificial Intelligence graduate from the University of Sussex, with two commercial programming internships at Glowmade and a shipped credit on *King of Meat*, published by Amazon Games. I am seeking a graduate gameplay programmer role where I can apply my experience developing responsive gameplay systems in C++ and C#, contributing to large production codebases and collaborating closely with designers and gameplay programmers. My independent work also includes artificial intelligence, procedural generation and game-development projects using Unreal Engine, Unity and Godot.

## EDUCATION

**BSc Computer Science & Artificial Intelligence -University of Sussex, UK**

**Sept 2023 – June 2027**

**First Class Honours**

Key Modules: applied machine learning (96%), Acquired Intelligence & Adaptive behaviour (84%), Software engineering (77%), Advanced programming (73%), Computer systems (81%)

**Foundation Computing – University Sussex**

**Sept 2022- June 2023**

Modules included: C++, HTML 5, CSS, program design & professional skills.

**LVS – Ascot**

**2013 - 2022**

A-Levels: Mathematics, Physics, Computer Science. GCSE's: 9 including Sciences, Maths & English

## EXTRACURRICULAR COURSES

- Artificial Intelligence and Artificial Neural Networks (2020), Basic penetration testing in computing (2019)
- Python (2019), C# (2018), C++ (2017)

## PROFESSIONAL DEVELOPMENT

**Programming Intern, Glowmade, June - August 2024**

- Credited Programmer on shipped King of Meat published by Amazon games
- Worked on design and implementation of gameplay system, including the current dispenser & throwing system
- Developed level mutators for live service events
- Implemented player upgrades to enhance gameplay progression
- Extended functionality for the grabbable system and implementing pushing mechanics
- Worked with large existing codebase, collaborating closely with designers and other gameplay programmers.

**Programming Intern, Glowmade, June - July 2023**

- Wrote feature code in C++ for gameplay systems
- Debugged and resolved gameplay and system bugs to improve player experience
- Participated in gameplay discussions as part of gameplay strategy team
- Worked within the Agile development process, delivering gameplay features in sprints
- Gained experience working in a commercial game production pipeline

**Private Tutor, 2023 - present**

- Tutored Degree, A-Level, GCSE & Primary level students in C++, C#, Python & Java
- Developed strong communication skills through explaining complex technical concepts clearly.

## TECHNICAL SKILLS

**Programming languages & Games Engines:** C++, C#, Python, Java, Lua, SQL | Unreal Engine, Unity, Godot

**Games Programming:** Gameplay programming (Player, mechanics, upgrades. Interactable systems), system programming within existing engines & codebases, debugging, optimisation and bug fixing, Object-oriented programming & clean code practices, Maths and Physics applied to games.

**Game development & Production:** Commercial game engine experience, live service game development, feature development in large collaborative teams, version control (Git/ in-house studio systems), development tools: Visual studio, debuggers, profilers

**AI & Computing:** Applied Machine Learning fundamentals, AI systems & adaptive behaviour, Decision-making systems, data driven programming & databases

**Languages:** English (Native), German (Proficient) - Eligible to work in the UK, EU and USA (UK, EU & US citizenship)
